

2022 Mustang Mach-E

Models impacted: Premium, California Route 1, Select with Comfort Tech Package & GT with Tech Package

Subject: Active Park Assist 2.0 Prep Kit Acknowledgement

A global semiconductor shortage has impacted the ability to produce the vehicle with the Active Park Assist 2.0 feature. In an effort to get your all-electric 2022 Mustang Mach-E SUV sooner, your vehicle has been produced and delivered without Active Park Assist 2.0 and instead has Active Park Assist Prep Kit.

Description:

- **Active Park Assist 2.0** - a handsfree experience which takes over shifting, steering, braking and acceleration to help navigate into a parallel or perpendicular space.
- **Active Park Assist Prep Kit** - enables the Active Park Assist 2.0 feature to be purchased and installed by your Ford Dealer at a later date.

Thus, a **\$325 credit** is reflected on your vehicle invoice for the removal of Active Park Assist 2.0 and is reflected on the window label as "ACTIVE PARK ASSIST PREP KIT".

Please know that we value you as a customer and appreciate your understanding. We are excited for you to begin enjoying and experiencing your Mustang Mach-E.

Acknowledgement

By accepting this \$325 reduction of the MSRP, I understand and agree as follows:

This vehicle is equipped with the Active Park Assist Prep Kit and I/we will have the opportunity to purchase Active Park Assist 2.0 at a later date.
